

HASSAN BENHAROUGA

FULL STACK SOFTWARE ENGINEER | JAVA • SPRING BOOT • ANGULAR

Paris, France | +33 6 34 12 57 01 | hassan.benharouga@gmail.com | LinkedIn | Driving Licence (B)

PROFILE

Full Stack Software Engineer specializing in Java / Spring Boot and Angular, working on complex business applications and distributed environments. Significant experience on systems handling large data volumes, critical processing, microservices architectures and rich user interfaces. Skilled in Java/Spring modernization, REST APIs, Docker, CI/CD and OAuth2/OIDC/JWT security. Currently strengthening expertise in Kafka, Kubernetes, DDD and generative AI integration in software development.

TECHNICAL SKILLS

Backend	Java 8-21 • Spring Boot • Spring Cloud • API REST • Microservices • Kafka • RabbitMQ
Frontend	Angular • TypeScript • JavaScript • Angular Material • AG Grid
Data	PostgreSQL • Oracle • SQL / PL/SQL • MongoDB
Cloud / DevOps	Docker • Kubernetes • AWS • GitLab CI • Jenkins • SonarQube • Git
Quality / Architecture	TDD • DDD • BDD • JUnit • Mockito • Spock/Groovy • Cucumber • Event-Driven Architecture
Security / AI	OAuth2 • OIDC • JWT • Spring Security • Generative AI / LLM • Spring AI • RAG • LangChain4j

PROFESSIONAL EXPERIENCE

Zenika | Full Stack Developer / IT Consultant May 2026 - Present
Paris | Advanced technical training and skills development

- Hands-on development of Domain-Driven Design (DDD) skills for modeling complex business domains.
- Advanced training in event-driven architectures with Apache Kafka and container orchestration with Kubernetes.
- Training in the integration and advanced use of generative AI within software development workflows.
- Contributed to a Java/Spring Boot and Angular platform helping consultants prepare for assignments and interviews, with AI features integrated using Spring AI and LangChain4j.

Sully Group | Software Engineer Jan. 2024 - Mar. 2026
Client: RTE France | BOSS Energy (multi-agent architecture) & BOSS Billing (distributed microservices architecture) | Paris La Défense

- Designed and developed a unified gateway for BOSS Energy and BOSS Billing, centralizing access, strengthening security and simplifying front-end integrations.
- Developed Angular / Angular Material / AG Grid interfaces for handling and analyzing large data volumes.
- Contributed to the BOSS Billing monitoring dashboard for real-time tracking of critical billing processes.
- Designed data-difference analysis features across monthly and 15-minute data versions, improving quality control and traceability.
- Designed and optimized SQL / PL/SQL processing on Oracle for large data volumes.
- Performed the technical stack migration from Java 11 to Java 21 and Spring Boot 2 to Spring Boot 3, adapting code and dependencies to ensure compatibility and long-term maintainability.
- Partially redesigned the BOSS Histo backend to implement permanent archiving for data previously stored temporarily.
- Developed and maintained Java / Spring Boot services and Angular applications in a distributed microservices environment; unit testing with Spock/Groovy and automated regression testing with Cucumber.
- Implemented Kafka event traceability in the event log, improving monitoring and analysis of asynchronous exchanges.

Capgemini - HSBC | Backend Developer**May 2023 - Nov. 2023***BELLE Project - Information System migration to Arkéa | Paris La Défense*

- Designed and developed backend services and features with Spring Boot based on business specifications.
- Performed corrective and evolutionary maintenance of Spring Boot services and resolved defects in collaboration with the team.
- Analyzed functional and technical specifications to translate business requirements into appropriate backend enhancements.

Capgemini - AFJ | Full Stack Developer**Nov. 2022 - Apr. 2023***Project supporting women victims of human trafficking | Issy-les-Moulineaux*

- Developed and maintained frontend/backend components in an AWS environment; redesigned UI/UX and fixed application defects.
- Developed web services and APIs with Node.js / Express and implemented role-based access control.
- Developed a user role and access-rights management system including an administration interface; backend testing with Chai/Mocha and full application containerization with Docker.

Capgemini | Stage Full Stack Developer**Apr. 2022 - Sep. 2022***Internal real-estate management project | France*

- Developed an internal web application for real-estate management and completed professional technical training.

MDB Production | Stage Full Stack Developer**May 2021 - Sep. 2021***E-commerce microservices project | Remote*

- Designed and built a distributed e-commerce application from scratch using Spring Boot / Spring Cloud, OpenFeign, Gateway and Eureka.
- Implemented Spring Security / JWT security, Angular / Angular Material frontend and JUnit / Mockito tests.
- Developed a collaborative-filtering recommendation system with Python / Flask and a Power BI dashboard.

EDUCATION**Master's Degree - Information Systems Expert - Ecole-IT - Orléans****2021 - 2022****Master MIAE - Information Systems Audit and Design - Université de Lorraine - Nancy****2020 - 2021****LANGUAGES & INTERESTS**

Languages: French (bilingual) • English (professional proficiency) • Arabic (native) Interests: Motorcycling • Fitness • Football • Music • Video games • Hiking • Reading
